Driving Intelligence

Don't just log hours with ELD. Get more out of them

Turn compliance into a competitive advantage with Coretex ELD

Coretex has built its ELD solution from the ground-up and created one of the few fully integrated, ELD solutions on the market today. For organizations that want a fully featured, fully integrated ELD solution, Coretex is best in class.

Coretex ELD Supports

- Multi driver rule-sets across US and Canada,
- including intrastate rules
- Team, exempt and short-haul drivers
- Permanent and temporary vehicle installations
- ELD compliance for rental vehicles
- Log in regardless of coverage
- BYOD

Coretex ELD for drivers

Coretex ELD gives drivers the ability to:

- Check availability prior to logging in
- View availability in multiple rule-sets
- Log in regardless of coverage, meaning logs at device are always current
- Receive driver notifications for specialized rule set limits like 100 or 150 air mile radius, Big Day, State and Federal border crossings
- View and edit driver logs
- View availability in all rule sets assigned by a supervisor

Coretex ELD for supervisors

Staff responsible for records and keeping drivers safe can easily use Coretex 360 to manage and maintain driver records.

With Coretex ELD supervisors can:

- Easily assign unidentified driving records
- Propose edits to driver records
- Drag and drop to add status for quick log editing
- View driver available hours (previous seven days and driver availability for next two)
- Access driver logs screen with interactive filtering for managing compliance (e.g. uncertified logs, driver edits, proposed edits

- Manage ELD compliance with alerts for:
  - Violations
  - Unidentified driving events
  - DVIR with defects
  - Roadside Inspections
