CORETEX

MIXED FLEET SOLUTION

Manage everything on one platform – Reefer, Straight Trailers, In-cab & compliance – driving down costs and keeping assets rolling for longer.

Coretex solutions give carriers the visibility, confidence and control they need to deliver first class-customer service with the lowest possible cost. Our comprehensive fleet management toolkit is ideal for mixed fleets operators. With over 50 features, it's the industry's most sophisticated feature-set.

Coretex gives you full control of all your needs in one place – from two-way remote reefer control of up to 3 doors to advanced power management to preserve reefer and TMU battery life. In-cab solutions include powerful FSMA, ELD, IFTA, DVIR, fatigue and job management capabilities, plus a broad range of productivity, safety and reporting functions all tightly integrated with onboard cameras. Coretex is the natural choice for mixed fleet carriers.

Today, Coretex manages thousands of reefer units and tracks over two million logs daily across both Carrier and Thermo King assets.

Leading fleet management solution for mixed fleets

1. Fully integrated hardware & software platform
2. Continuous core temperature readings
3. Additional devices such as fuel, humidity, door sensors
4. Cross boarder ELD, DVIR & driver behavior
5. ABS/EBS monitoring
6. Tire inflation event monitoring
7. Remote control of trailers
8. On-board Bluetooth and Wi-Fi
9. Trusted partner
10. Deep integrations with TMS systems

A single platform solution for your entire fleet

Core Temperature Monitoring

Core temperature monitoring for FSMA and other compliance obligations with a powerful range of options

Two-way Remote Control

Reefer control at any time and from any location via desktop or mobile device.

ELD Certified

A full suite of enterprise compliance solutions including ELD and DVIR built from the ground up

Video Capture of Events

Every event automatically capture and uploaded to Coretex 360 and alerted.

Real-time Driver Feedback

Your drivers get live feedback and can adjust their performance in real time.

Remote Start Stop

Remotely start up a reefer on an instant or scheduled basis.

Reefer Display

In-cab display of rich reefer data. Available on Android device even when away from the trailer.

TMS Integrations

Full integration with all major operational systems, including McLeod, TMW, Appian and other transportation management system

“

I recommend Coretex because the solution has proven to be a reliable provider of real-time information that supports efficient operations and safely protects the integrity of our customers’ cold chain.

Coretex IBRIGHT

Coretex iBRIGHT is the essential platform for dispatchers, safety teams, maintenance teams and plant managers to get the best out of every aspect of a fleet operation.

Coretex Drive

Coretex Drive is the best tool for drivers to connect with dispatchers, receive job information, track driver hours, navigate and receive alerts. It is designed for easy in-cab use with big buttons and an easy-to-read interface, and supports all apps

Coretex Mobile App

See your vehicles whenever, wherever with the Coretex 360 mobile app. See their latest movements and send them messages, connecting with Coretex Drive. Avaliable on Android and iOS.

TMU1500

TMU1500 is our premium device offering. With built in engine management, 3-axis accelerometer and on-device geofences, you'll never miss an event.

TMU600

The TMU600 is ideal for maintaining compliance and safety. Both portable and integrated options are available and include the ability to remotely upgrade the operating system.

Integrated Camera's

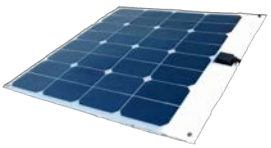
Recording for up to 72 hours with automatic uploads to 360, you can review and download incidents as needed. The cameras are fully integrated with our 3-axis accelerometer incident replay

Fuel Sensor

FYWRD harness and CorePLC module

E-Harvest Truck Power (TR7)

Mi-Jack Power In Lock



E-Harvest Solar

Smart Breakout for Smart Lights

SOFTWARE FEATURES

Live tracking

See all your assets in real time

Remote management

Monitor your operation directly from your phone

Replay

See where your vehicles have been and what they have been doing

Geofencing

Monitor locations with visits, dwell time and more

Driver behavior

Monitor your drivers hours, speeding, harsh cornering, and more

Camera integration

Fully integrated cameras with incident capture

Multi-fleet

Flexible asset grouping to differentiate between fleets

Advanced alerting

Advanced alerting based on our business rules engine

Servicing

Log services, view full history log and set reminders when any services are due

Dashboard & reports

Visualize vehicles, locations, fleets, drivers, EMS, ELD and more

Engine management

Measure RMP, fuel usage, oil temperature and more

Two-way messaging

Stay in contact with your drivers with two-way messaging

ABS/EBS Monitoring

Improve your efficiency and life of trailers with full visibility

Remote control of trailers

Turn your trailers on or off, set the temperature now or scheduled it for later – all from the comfort of your office

Tire inflation events

Protect your investment by having full visibility of an invisible event

Fuel Humidity and Door sensors

Our range of sensors will give you a full view of your trailers

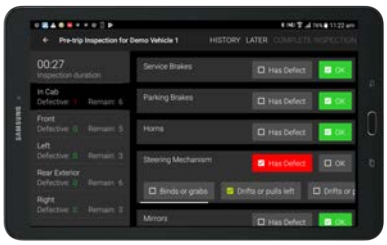
Continuous core temperature readings

Have full proof for your customers with continuous core temperature

Electronic Logging Device

Fully certified ELD solution with multi driver rule sets across US and Canada. Supporting permanent and temporary vehicle installations, Log ins regardless of coverage and a full suite of reports

Driver Vehicle Inspection Reports



Fully integrated Driver Vehicle Inspection Reports (DVIR). Pre-set or customizable, the reports automatically send faults back to Coretex Service Manager.
